

The CIRIN Bibliography – Explanations

August 26, 2021

The three bibliographies visitors can access on this website are working documents. As such, they are not ‘final’, ‘publishable’ products but work-in-progress documents which are updated and corrected on a continuous basis. Because of this work-in-progress status, I had not made them public, but having received several requests, I now believe their potential usefulness to colleagues may make open access to them a better option in spite of their shortcomings.

At this point, the bibliographies only include CIR entries, not entries which are listed in the *Bulletin* under Signed Language Interpreting or Other interpreting-related entries. These may be added at a later stage.

For each entry, the bibliographies indicate the *CIRIN Bulletin* issue in which it was reported. Note that the format of the three bibliographies is not identical.
